

# Optional services for maintenance contract

power brick as a spare for DELPHYS XL UPS

Take advantage of the "Power brick as a spare" option of your service contract and maximise the availability of your DELPHYS XL UPS.

Coupled with a maintenance station, you can have a spare power brick kept in working order at all times near your DELPHYS XL.

### Maintaining availability

With its internal redundancy, should a power brick fail the DELPHYS XL UPS will continue to operate in double conversion mode provided that the operating load does not exceed 80% of the nominal load.

### "All inclusive" option

We provide the spare brick and maintenance station, with a Socomec expert carrying out the maintenance (including brick spare parts and consumables).

### Minimises MTTR

When we replace and repair the faulty brick, we need no more than 30 minutes to bypass the load as we replace the brick. We can schedule in the work to suit the terms of your service contract.

### A solution that counts as an operating expense (OPEX)

With this option, you can keep on top of your finances without impacting your cashflow.

### Key points

- > Reduced MTTR
- > Operational power brick kept at the customer's site
- > Manage a complete brick rather than spare parts
- > Use this option to cover the needs of multiple machines installed at the same site
- > Socomec accepts ownership and liability for the brick
